ABSTRACT

This report is based on a questionnaire survey sent to the registrars of all two-year and four-year colleges and universities in the United States. Replies were received from 2,494 institutions, of which 2,313 reported registrations in one or more foreign languages. The fall 1974 survey shows a decline of 6.2% in total foreign language registrations between 1972, the year of the last previous survey conducted by the MLA, and 1974. Registrations declined by more than ten percent in French, German, and Russian, but by less than one percent in Italian and Spanish. There were increases for Latin, Ancient Greek, and a number of the so-called "other" or less commonly taught languages. Spanish continues to be the leading language in U.S. colleges, accounting for over 38% of the total. The report consists of an introduction, five summary tables, thirteen detailed tables, and an institutional directory. The detailed tables present data by state or by region for the seven most commonly taught languages and for the aggregate of "other" languages, as well as detailed comparative figures from surveys undertaken in 1965, 1970, and 1972. ABSTRACT

Brod, Richard I.

Survey of Foreign Language Course Registrations and Student Contact Hours in Institutions of Higher Education, Fall 1974.

August 1976

Modern Language Association of America, 62 Fifth Avenue, New York, N. Y. 10011

U. S. Office of Education, Division of International Education, Contract No. OEC-0-74-2125

This report is based on a questionnaire survey sent to the registrars of all two-year and four-year colleges and universities in the United States. Replies were received from 2,494 institutions, of which 2,313 reported registrations in one or more foreign languages.

The fall 1974 survey shows a decline of 6.2% in total foreign language registrations between 1972, the year of the last previous survey conducted by the MLA; and 1974. Registrations declined by more than ten percent in French, German, and Russian, but by less than one percent in Italian and Spanish. There were increases for Latin, Ancient Greek, and a number of the so-called "other" or less commonly taught languages. Spanish continues to be the leading language in U. S. Colleges, accounting for over 38% of the total.

The report consists of an introduction, five summary tables, thirteen detailed tables, and an institutional directory. The detailed tables present data by state or by region for the seven most commonly taught languages and for the aggregate of "other" languages, as well as detailed comparative figures from surveys undertaken in 1965, 1970, and 1972.

FOREWORD

The present study of college language registrations is the twelfth in a series that Modern Language Association has conducted under contract with the United States Office of Education. It is the fifth to present data for all foreign languages, both classical and modern, in colleges and universities in the United States. The body of the report consists of a set of five summary tables (designated A through E), a set of thirteen tables giving detailed breakdowns of the Fall 1974 data as well as trends going back to 1965, plus a computer-printed directory of the complete language registration data reported by the 2,313 responding institutions.

To facilitate the study of trends in foreign language registrations over the fourteen year period between 1960 and 1974, registration data from surveys undertaken in 1960, 1968, 1970, 1972, and 1974 were incorporated into summary tables A,C,D, and E; and data from the 1965, 1970, 1972, and 1974 surveys are juxtaposed in several of the detailed tables (specifically, tables 4 through 10). In the latter set of tables, the year 1965, the first in which registrations in Latin and Ancient Greek were added to the compilations for the modern foreign languages, has been chosen as the base year for the calculation of comparative index figures for the individual languages and regions.

It should be borne in mind, in consulting the comparative figures, that they derive from different institutional bases in the different years, ranging from a base of 1,661 institutions in 1960 to 2,313 in 1974. In each year, however, the response rate achieved by the MLA survey has been above 90%, in some cases above 99%.

As in the 1970 and 1972 surveys, information on student contact hours was requested from college registrars together with the number of registrations in each language. Due to limitations of space, however, data on aggregate contact hours have not been included in the present report. Instead, the average number of contact hours per student per week has been computed for the aggregate of registrations in all languages in each state; these figures are reported in Table 1.

Since 1968 the foreign language research staff has made use of the MLA's computer for recording, compiling, and sorting institutional registration figures for the less commonly taught languages, i.e., all languages other than French, German, Italian, Russian, Spanish, Latin, and Ancient Greek. In 1974 an expanded computer capacity enabled the staff to record the entire body of data for commonly and less commonly taught languages alike, a total of 9,201 separate records. The data can be sorted and printed either by state and institution or by language. The directory portion of the present report consists of the complete printout by state and institution, separately for the four-year and two-year institutions.

The data for the present report were compiled and tabulated by senior research assistant Jeffrey H. Meyerson with the assistance at later stages of Rika Burnham and Carol Goldner. Computer programs for the sorting and printing of the data were developed by MLA Director of Computer Services Hans Rutimann and Operations Manager Cuyler W. Bleecker.

The staff is grateful to Mrs. Julia A. Petrov of the U.S. Office of Education for her helpful cooperation and responsiveness to inquiries and requests. We also acknowledge here the excellent cooperation of the college registrars and department chairmen who supplied the data upon which the report is based.

Richard I. Brod

Modern Language Association

FOREIGN LANGUAGE REGISTRATIONS IN INSTITUTIONS OF HIGHER EDUCATION, FALL 1974

The basic data for this report were obtained from a questionnaire sent to the registrars of the 2,498 two-year and four-year institutions listed in the MLA's computerized files, plus an additional roster of institutions--largely seminaries--taken from the 1973-74 edition of the Education Directory: Higher Education published annually by the National Center for Education Statistics (NCFS) of the U.S. Department of Health, Education, and Welfare. Of the 2,494 institutions replying to the questionnaire, 2,313, or 92.7%, reported registrations in one or more foreign languages. In the last previous full-coverage survey, that of Fall 1972, 2,617 institutions were canvassed and 2,614 replies were received. Of these replies, 2,419, or 92.5% of the total completing the questionnaire, reported registrations in foreign languages.

The 1974 survey shows a total of 946,635 foreign language registrations--a drop of 6.2% since the last published report in 1972. The 1970 survey report was the first in the series to show any decline at all: about 1.4% below the peak enrollment year of 1968. The 1972 survey showed a further decline of 9.2%. The results of the most recent investigation suggest that the rate of decline may have begun to level off.

As was the case in 1970 and 1972, the downward trend in college foreign language enrollments is especially serious in the light of continuing growth of college enrollments in general, since it means that the role played by foreign languages in the U.S. college curriculum is diminishing even more rapidly than the absolute number of students taking language courses. Table A compares total college enrollments (as reported by the NCES) with MLA's figures for modern foreign languages, giving a percentage ratio for each of the years in which the MLA conducted its survey.

Table B shows the results of the MLA's 1974 survey, with a breakdown by language for the seven most commonly taught languages, plus an aggregate figure for the "other" languages, tallies for two-year college and graduate registrations, comparative totals from the 1972 survey, and a figure showing percentage change in the language totals between 1972 and 1974. As the table shows, the decline in enrollments was not uniform in all languages and segments of the higher education community. Thus, the decreases in French and German enrollments were more severe than those in Russian, and Italian and Spanish enrollments managed to hold steady. Italian has now displaced Russian as the fourth most widely taught foreign language. Enrollments in Ancient Greek and Latin enjoyed a significant increase.

Five languages--French, German, Italian, Russian, and Spanish--accounted for 88.0% of the total registrations in foreign languages in the colleges and universities covered in the survey; Latin and Ancient Greek accounted for an additional 5.2% and the remaining 6.8% were distributed among 109 additional languages, ancient and modern. Spanish, having displaced French from its "leadership position" in 1970, is still the most widely taught foreign language in U.S. colleges and universities, as it has been in secondary schools for many years. Spanish is the leading language in registrations in 36 states; French holds first rank in 11 states and the District of Columbia; German leads in two states; and Japanese is the most popular language in one state (Hawaii).

Spanish now accounts for 43.4% of the total registrations in the five leading modern languages. In 1960, Spanish had only 30% of the total, and French had 38.4%. Table C, based on the registrations in the five leading languages, shows the percentage of the total in each language from 1960 to 1974. Table E depicts growth trends in the five leading modern languages between 1960 and 1974.

Foreign Languages in the Junior Colleges

As junior and community colleges in the United States continue to grow in size and number, they become increasingly significant in enrollment studies. In 1960, 455 two-year colleges reported foreign language registrations; by 1972 the number had grown to 899. In fall 1974, foreign language offerings were reported by 835 two-year colleges, fewer than in 1972, but their language enrollments had increased by 1.9% since 1972. Spanish, with 56.4% of the language enrollment in the junior and community colleges, is the leading language in this category; French is in second place, and German in third.

Russian, Chinese, and "Other" Languages

After a sharp decline (11.1%) between 1968 and 1970 figures, enrollments in Russian improved to the point that they were able to hold steady (0.6% increase) between 1970 and 1972. This improvement, taken together with the rapid growth of enrollment in Chinese during the same period (from 6,238 to 10,044, or 61.0%) gave clear evidence of a direct connection between language enrollments and external events--in this case the strengthening of political and commercial ties between the U.S. and both the Soviet Union and the People's Republic of China. The downward turn of Russian enrollments between 1972 and 1974 suggests, however, that the effects of the apparent renewed interest in Russian were short-lived.

The growth rate for the so-called "other" or less commonly taught languages continues to be encouraging. In the aggregate, they grew 7.7% between 1972 and 1974 and several of them--most notably Norwegian and Arabic, grew at even faster rates during this period. Table D shows enrollment trends in the ten most widely taught "other" languages.

APPENDIX II.

SURVEY REPORT FORM

THE MODERN LANGUAGE ASSOCIATION OF AMERICA

62 Fifth Avenue, New York, N. Y. 10011 • Tel: (212) 741-7882

SURVEY OF FOREIGN LANGUAGE COURSE REGISTRATIONS AND STUDENT CONTACT HOURS IN U.S. INSTITUTIONS OF HIGHER EDUCATION, FALL 1974.

TO THE REGISTRAR:

The Modern Language Association is continuing its series of studies on the status of foreign languages in the colleges and universities of the United States.

The published report on the results of this survey will include a directory with a record of course registrations and student contact hours in each foreign language taught, institution by institution. Language trends will be charted for the period 1960-74.

We believe that the simple card form will enable you to report the data for your institution with a minimum of time and effort.

Note that registration figures and student contact hours are requested for all foreign languages, ancient as well as modern.

We are grateful for the cooperation that the Modern Language Association has received from college registrars in past surveys. We hope that your institution will participate, through you, in the present national study.

INSTRUCTIONS

1. Separately for undergraduate and graduate levels, report Fall 1974 registrations and student contact hours for all foreign language courses that carry credit. (Student contact hours are computed by multiplying the number of individual registrations in each course by the actual number of hours the student attends the course in a given week.)

2. Include all students who are taking the given courses for credit, even though some of the students may not intend to take degrees. Such students may be enrolled on the main campus, a branch campus, or an extension center, in day, evening, or Saturday classes. Do not count auditors.

3. A student enrolled in more than one language course should be included in the total course registration of each, whether the courses are in the same language or in different languages.

4. Please complete the form below and mail it as soon as possible. No postage is required.

(Even if your institution has no foreign language registrations in Fall 1974, please return the form with your signature.)

Registrations and student contact hours in courses primarily for UNDERGRADUATES:

Language	No. of registrations	No. of student contact hours
French		
German		
Italian		
Russian		
Spanish		
Latin		
List other languages below:		

Do you plan to offer foreign language courses in Summer 1975? ☐ Yes ☐ No

Registrations and student contact hours in courses primarily for GRADUATES:

Language	No. of registrations	No. of student contact hours
French		
German		
Italian		
Russian		
Spanish		
Latin		
List other languages below:		

If this report includes branches, please list location:
